

### innoVi Edge™ 200

innoVi Edge™ 200 is a compact appliance with pre-loaded Agent Vi software, that connects ONVIF / RTSP fixed IP cameras from the cameras' network to innoVi video analytics service / solution.

### Number of Supported Cameras

RTSP Video Stream Resolution	Full HD 1080p Video	HD 720p Video
Frame Rate (FPS) <sup>1</sup>	30	12
<b>Number of Cameras<sup>2</sup></b>	<b>8</b>	<b>20</b>

Note:

(1) 12 FPS is the minimal supported frame rate, 30 FPS is the highest frame rate tested

(2) Benchmark performed with H.264, main profile, RTSP streams. Different quality settings may result in higher/lower number of supported cameras

### Bandwidth Considerations

Constant 50kbps per camera for continuous video analysis

- Uploading of event clip - ~0.625MB (standard resolution) or ~0.15MB (low resolution) per event
- Viewing camera's live view in innoVi GUI - ~330Kbps (standard resolution) or ~150Kbps (low resolution) per camera

Note: Refers to upload bandwidth; download bandwidth is negligible

### Network Considerations

- Cameras connected to innoVi Edge must have static IP addresses (dynamic IP allocation may result in service discontinuity)
- Cameras' network must allow outgoing HTTPS traffic through port 443
- Network latency from innoVi Edge to innoVi servers should be less than 200ms

Hardware	
Network Ports	Gigabit Ethernet
Input Power	100-240V
Power Supply	65 Watt (External), power cord included
Dimensions	Size: 6.9 x 1.3 x 7 in / 175 x 34 x 177 mm * Weight: 2.9 lb / 1.3 kg
Temperature Range	50° to 95° F (10° to 35° C)
Warranty	
Three year warranty (provided by the device manufacturer) whereby units with a problem that cannot be remedied remotely will be replaced with a new unit	
Agent Vi Part Number	
EDG200	innoVi Edge compact appliance, Model 200
